

PlayStation VR2

Product Overview

PlayStation VR2 is a virtual reality system designed specifically for the PlayStation 5 console. The headset uses advanced OLED displays capable of delivering 4K HDR visuals, providing a sharp and immersive virtual environment. The system also integrates eye tracking technology that improves interaction and rendering efficiency within VR applications. The device includes dedicated VR controllers with haptic feedback that enhance immersion during gameplay. PlayStation VR2 is supplied by Sony Europe and can be delivered through courier services. The approximate retail price of the headset is 549.99 euros.
